

**Imagine.
Create.
Transform.**

Children's Furniture and Interior Space Solutions

CAPABILITIES

At Kidropolis we specialize in furniture and interior space solutions for children. Our creative designs and custom built furniture transform a child's room into a unique, personal and functional space.

Every project is born from creativity and comes to life through a detailed and clear process. The key milestones to every project are consultation, design, fabrication and installation. Each step provides both the build team and the family or business an opportunity to share ideas, create and personalize their unique space.
